Introduction.

I take great pleasure in inviting all who are interested in flowers and contemplate planting, to visit my flower fields when the gladioli, dahlias, phlox, roses and other flowers are in bloom, for they can made their selections in the field with the plants before them, with much greater satisfaction than from catalog descriptions.

My flower fields are in Mattapoisett, Mass, located six miles east of the City of New Bedford, Mass. The fields are one-third mile north of the state highway on the Acushnet Road.

Cash with order unless credit has been established. No C. O. D. order will be shipped unless there is a 25% deposit. All prices and quotations are subject to stock being unsold.

I will use the greatest care to pack all bulbs true to name, but do not assume any responsibility for errors except to replace stock that may prove untrue.

A first size bulb is from 1¼ inches up. We always try to fill all orders with the largest bulbs.

Gladiolus, sword-lily, the diminutive of Gladius, a sword, referring to the sword-shaped leaves. Natural Order Iridaceae.

The history of the gladioli goes back to the early ages of Europe. That continent was the cradle of this beautiful flower. This extensive and well known genus contains about ninety species, many which are amongst the most popular out-of-door summer and autumn flowering so-called "bulbous" plants. These are found growing in their natural estate in Central Europe, the Mediterranean region, western Asia and Africa. But most of the species are of southern Africa and remarkable for their easy culture, where they produced the first and improved every strain. But as people in America always do things a little better, the "America Hybridzes" with skill and zeal has attained the height of perfection, such as A. E. Kundred, the gladioli wizard; Richard Diener and J. A. Kemp and many others who have created and introduced the wonderful sensational varieties of the best collections of today.

CULTURE

Gladioli, like all other cultivated crops, need some thought in regard to culture. While they will grow and bloom under most conditions, it is necessary to cultivate often and thoroughly and not allow the ground to bake around the plants. The soil should be well prepared and reasonably rich, using good commercial fertilizer. Spade deep and pulverize thoroughly. Gladioli to do their best must have plenty of fresh air and sunshine.

Bulbs may be planted any time between the months of May to June, right side up, in double or single rows, four to five inches deep, in the furrows 18 inches apart.

THE FLOWER GROWER

For good culture and points, I highly recommend the "Flower Grower," published by Madison Cooper, Calcium, N. Y. \$1.50 per year.

Dahlias.

No other flower will give you more pleasure to cultivate than the dahlias. More blooms of beautiful colors are to be had for much less money than any other flower, they are very distinct in appearance and estimated one of the most beautiful and graceful flowers for decorative purpose. The beauty of these flowers can only be appreciated when seen, and may easily be classed with the most gorgeous flowers because of their fantastic shapes and colors.

I have a large amount of dahlias, which I can offer at a low price for those who do not care for named varieties. \$1.00 per dozen, unnamed.

CACTUS DAHLIAS

ROSES—Continued

OPHELIA (H. T.)—Color bright salmon suffused with apricot yellow, deepening toward golden king. Wonderfully fragrant with long pointed buds on long stiff stems. Large, handsome, healthy foliage. Wonderfully free bloomer and grower and not prone to mildew. Blooms all season. \$1.00 each.

PAUL'S SCARLET CLIMBER (H. C.)—It has been classified as a climber, but as a matter of fact it is more of a "Pillar Rose," because the strong basal shoots are only of medium length, with the result that the plant every year is a solid mass of the most vivid scarlet color which has ever appeared in any rose. The flowers are medium size, being semi-double and carrying three to six flowers on each spray. "Paul's Scarlet Climber" is a gold medal winner rose. \$1.25 each.

SILVER MOON (H. C.)—Pure white in color with yellow stamens in the center, showing up very attractively. Foliage is glossy-green; stems very long. Fragrance very lasting. \$1.00 each.

SUNBURST (H. T.)—Finest yellow rose of a rich-orange yellow with shades of golden yellow very intense; in every stage it is a beautiful rose. Buds long and pointed, flowers splendid when open. Growth vigorous and foliage very distinct and ornamental. \$1.00 each.

TAUSENDSCHOEN (Thousand Beauties) (H. C.)—Delicate shade of soft pink with reserve of rosy pink. Large trusses of large blooms. The flowers always changing in color from white to pink. \$1.00 each.

WHITE DOROTHY PERKINS (H. C.)—Pure white sport of "Dorothy Perkins," identical in every way except the color, which is snow-white. 75c each.

Hardy Perennial Plants.

Of all the plants that are cultivated for purely ornamental purposes there are none which have made such rapid strides in public favor as the "Old-fashioned Hardy Garden Flowers," the inhabitants of the perennial garden. Their popularity is not at all surprising when we consider the many varied and pleasant changes which take place throughout the entire growing season in a well-arranged hardy border.

A few years ago there were very few "Hardy Perennial Borders," but today almost every one who is fortunate enough to have even a small garden, devotes at least a part of it to hardy plants.

HARDY PHLOX

It is the flower that is now creating a great sensation and is worthy of culture and good garden space. Wonderful effects are produced by planting masses of each color of one plant especially the white phlox. They begin blooming in midsummer and continue until frost, always with vigorous blooms. In making selections keep in mind that though they are similar to each other, the varieties have distinct characteristics and that the phlox are hardy and after once planted continue growing season after season with so little attention that a child can cultivate them.

Price 20c each, \$1.50 per 10, except those marked with an asterisk (*).

Five at 10 rate and 25 at 100 rate.

PHLOX

ANNIE COOK—Flesh pink, large head, tall.

BARON VAN DEDEM—Blood red, dark eye.

B. COMTE—Brilliant, rich, French purple.

BEACON—Deep cherry red, a real dazzling flaming phlox.

BOULE DE FEU—French cherry red, a very good one.

PHLOX—Continued

- BRAGA**—Mauve rose, suffused salmon with white disc, very large flowers.
- COQUELICOT**—Fine rich scarlet with deep carmine eye, medium size flowers.
- ECLAISEUR**—Brilliant rosy-magenta, with large, lighter halo.
- *ELIZABETH CAMPBELL**—Light salmon changing to pink with dark red eye, one of the handsomest of all pink varieties. 25c each, \$2.00 per 10.
- ETTA'S CHOICE**—Tall, very strong grower, producing much branched pyramidal heads of pure white blooms.
- EUGENE DANZANVILIERS**—Lilac-blue, white center.
- EUROPA**—Snow-white, carmine center, one of the best eyed varieties.
- *FORDHAM**—A large white with faint pink eye. This produces the largest individual flowers of the phlox family. 50c each.
- FRAU G. VAN LASSBURG**—Pure white, one of the best middle season.
- GEO. STROHLIEN**—A bright scarlet, one of best reds.
- GRUPPEN KONIGAN**—Similar to Mrs. W. C. Egan, but a brighter pink.
- HECTOR**—Dwarf, fine pink, large heads, blooms all season.
- *KATHELEEN**—A graceful head of deep salmon pink, no collection complete without it. 35c each, \$3.00 per 10.
- L' ESPERANCE**—Light lavender-pink, the best in its class.
- LE MAHDI**—Metalic violet blue.
- LE SALEIL**—Brilliant china rose, rose center, very attractive.
- MISS LINGARD**—Blooms in May, fully six weeks earlier than the other sorts and continues in bloom for three months. A grand white variety which should be in every collection.
- *MRS. W. C. EGAN**—One of the finest phlox yet introduced and while the individual flowers according to the color chart are a delicate lilac color illuminated by a large bright salferino eye, the color effect as a whole is a delicate pleasing shade of soft pink. 25c each, \$2.00 per 10.
- MRS. SCHEMISKE**—Light lavender, very tall, producing much branched pyramidal heads of bloom.
- MRS. W. E. FRYER**—Vigorous, white malted a very pale pink.
- *MRS. E. E. JENKINS**—The best white phlox on the market, splendid for massing, come into flower early in season.
- PINK BEAUTY**—A very pleasing shade of bright pink.

PHLOX—Continued

PURITY—Pure white, very strong grower and very late bloomer with large truss.

ROSENBERG—Bright reddish violet with blood-red eye, large truss.

RYNSTROM—Bright carmine rose, large flower heads, medium height and strong grower, a great acquisition for the garden.

R. B. STRUTHERS—Bright pinkish salmon, crimson eye.

TAPIS DE BLANC—One of the dwarf white, middle season, fine for massing in front of tall sorts.

WIDAR—Bright reddish-violet with large white center.

I have a large mixture of phlox that have got mixed while handling the above named varieties which I can offer at a low price for those who prefer mixed colors.

While it is very interesting to grow named varieties it is a fascinating pursuit to grow new varieties from seed.

The seeds should be planted about the middle of October and a mulching put on after the first frost, then removed in early spring so that the plants may come up freely.

I offer seed from my best varieties at 25c per packet, five packets for \$1.00.

Strawberries.

The Gem of the Garden.

It is a wonderful thing to go into your own garden and pick this beautiful, delicious, fresh fruit for your table use daily and preserving.

Here are the names and descriptions of the most choice and selected varieties of all the strawberries.

STRAWBERRIES

AROMA—One of the best varieties of strawberries. It is one of the latest strawberries in season, maturing crops after the heavy picking season. The plants have no weakness of any kind and the fruit of Aroma pleases all because of its excellent quality and abundance of very large, roundish, conical shape, grossy-red berries. This strawberry is excellent for people who like them for table use late in season. 25c for 10 plants.

CHARLES I.—An extra early berry and produces a big crop of large berries of good quantity and the size holds up well all through their fruiting season. The berries are of uniform size and appearance, nice looking fruit and very delicious. Their vitality both in plant growth and production of fruit is wonderful, they thrive through dry summers better than any other variety. Perfect flowering. People who like strawberries for early, daily use on the table can have them nice and fresh from their own gardens. 25 plants for \$1.00.

DR. BURRILL—The well known million dollar strawberry. This berry is the biggest cropper of all strawberries. They are large and of good size and shape and they are more and bigger and of good quality. The foliage is large beautiful dark green, hardy and healthy with extra long, strong roots and heavy crowns. It is able to produce its wonderful crop of fruit every season. The berries are very dark and of fine appearance. 25c per 10 plants.

EARLY JERSEY GIANT—This strawberry is rarely equaled. It is a very large, medium, early berry of the highest quality, conical in shape and highly colored deep red, very firm and delicious and a fancy specimen. 25c per 10 plants.

GIBSON—A wonderful strawberry, the vines are simply loaded with large beautiful dark glossy red berries. The flesh of the berry is red clear through and of as fine a flavor as can be found in any strawberry and nearly round and regular. One of the most productive and bears through a long season. Blossoms perfect. 25c per 10 plants.

STRAWBERRIES—Continued

LUPTON—One of the largest and handsomest strawberries. The plant is a vigorous grower and produces, strong, healthy foliage. They are very productive and the berries are beautiful, uniformly large, bright red in color, very firm and easy to cultivate. 25c per 10 plants.

POMONA—For convenience I call this **Pomona**. It is one of the most handsomest and delicious of all strawberries. The berry is very large, conical shape, beautifully colored a dark glossy red, and of excellent quality and produces an abundance of fruit all through the season. It is a vigorous grower, deep strong roots and bright green foliage adding to its beauty and value. 25c per 10 plants.

RHUBARB

(Pie Plant)

The best time to set out plants is in the early spring or late autumn. Any good soil will suit rhubarb, but to obtain good crops, good soil well manured is indispensable. Cultivate during summer, but do not pull stocks the first year. In the fall cover the plants with manure.

I offer plants of very fine varieties, of strong, short, thick, stocks with mild flavor. Just the thing for for delicious pies and sauces. 15c each, \$1.00 per 10.
